polished gold edge all around

∞ Trackable: \$20.00

polished gold edge contains text: "Track at Geocaching.com" followed by a unique code

*no longer available*

## What are trackable coins?

**Trackable coins**, also known as **Geocoins**, are custom minted to have unique numbers engraved somewhere on the coin. The codes on the trackable versions of these particular commemoratives are located on the polished gold edge, after the text, "Track at Geocaching.com."

Geocoins are specifically designed to provide geocachers with collectable, tradable and trackable cache items that are unique to the worldwide activity known as **geocaching**.

If you choose one of these coins, you should keep that code private until you learn about the unique nature of these trackable items. In order for your coin to be trackable, you must activate it at:
